

Proposal & Agreement Automation Platform

Product Requirements Document (PRD)

For SCL Agency

1. Project Overview

Build a premium web-based Proposal, Agreement, and Payment Automation Platform for SCL Agency.

The platform must allow SCL Agency to:

- Create customized proposals
- Send branded proposal emails
- Offer multiple package options
- Allow clients to digitally sign agreements online
- Collect payments securely
- Automatically generate signed PDFs
- Track the full onboarding lifecycle from proposal to payment

The experience should feel modern, enterprise-level, and highly trustworthy — similar to:

- [DocuSign](#)
 - [PandaDoc](#)
 - [HubSpot](#)
 - [Regus](#)
-

2. Business Goals

The platform should:

- Reduce manual admin work
 - Streamline client onboarding
 - Increase proposal conversion rates
 - Automate agreements and payments
 - Improve professionalism and trust
 - Position SCL Agency as a premium innovation partner
 - Support scalable international operations
-

3. Target Users

Primary users:

- Startups
 - Entrepreneurs
 - Corporate clients
 - Investors
 - International clients
 - Agencies
 - Co-working clients
-

4. Brand & UI Direction

Design language:

- Premium SaaS interface
- Corporate aesthetic
- Clean layouts
- Smooth animations
- Mobile-first responsive design
- Modern typography
- High-end onboarding experience

Color palette:

- White
- Dark navy
- Accent blue

UI inspiration:

- Linear
 - Notion
 - Stripe
 - Framer
 - DocuSign
-

5. Core System Modules

Module 1 — Proposal Builder

Features

Admin can:

- Create proposals
- Save drafts
- Duplicate proposals
- Use templates
- Add branding assets
- Add custom sections
- Add pricing options
- Attach agreements
- Configure payment rules

Proposal Fields

- Client Name
- Company Name
- Email
- Phone Number
- Proposal Title
- Proposal Number
- Proposal Expiry Date
- Currency
- VAT toggle
- Signature requirement toggle
- Payment requirement toggle

Module 2 — Proposal Email Delivery

Email Features

- Responsive HTML emails
- Personalized client variables
- Proposal preview cards
- Open tracking

- Click tracking
- Email reminders
- Expiry reminders
- Branded email design

Example Email Structure

Subject:

Your Customised Proposal from SCL Agency

Body:

Hello [Client Name],

Thank you for taking the time to speak with us.

Based on your requirements, we've prepared a customised proposal for you.

Please review the available options below and click "View Details" on the option you would like to proceed with.

If you have any questions, feel free to contact us.

Kind regards,

Shinsa Lyonga Lomboto

Founder — SCL Agency

6. Proposal Options System

Each proposal can contain multiple package options.

Option Card Structure

- Package Name
- Description
- Duration
- Original Price
- Discounted Price
- Billing frequency
- Feature list
- CTA button

CTA:

"View Details"

7. Proposal Detail Page

When a client clicks “View Details”, they are redirected to a dedicated proposal page.

Proposal Page Includes

- Company branding
 - Client details
 - Service overview
 - Deliverables
 - Pricing breakdown
 - Timelines
 - Terms & Conditions
 - Agreement section
 - Signature section
 - Payment section
-

8. Agreement System

Agreement Features

- Dynamic placeholders
- Auto-generated agreements
- Multiple agreement templates
- Legal formatting
- Clause management
- Auto-filled client information

Supported Agreement Types

- Service Agreements
- NDAs
- Retainer Contracts
- Licensing Agreements
- Freelance Agreements
- SaaS Agreements

Dynamic Variables

Examples:

- {{client_name}}

- {{company_name}}
 - {{proposal_price}}
 - {{duration}}
 - {{start_date}}
-

9. Digital Signature System

Clients must be able to:

- Draw signatures
- Type signatures
- Upload signatures
- Initial pages
- Accept terms via checkbox

After Signing

The system automatically:

- Generates signed PDF
 - Emails signed copy to client
 - Emails signed copy to admin
 - Saves agreement in dashboard
 - Captures timestamps
 - Captures IP address
 - Creates audit trail
-

10. Payment Collection System

Supported Payment Gateways

- [Stripe](#)
 - [PayFast](#)
 - [Peach Payments](#)
 - [Ozow](#)
 - [Yoco](#)
 - [PayPal](#)
-

11. Recommended Payment Flow

Step 1

Client receives proposal email

Step 2

Client reviews proposal options

Step 3

Client clicks “View Details”

Step 4

Client reviews agreement

Step 5

Client digitally signs agreement

Step 6

Immediately after signing:

Client is redirected to secure payment page

Payment Page Message

“Your agreement has been signed successfully.”

“To activate your service/project, please complete payment below.”

Step 7

Client completes payment

Step 8

System automatically:

- Marks proposal as Paid
- Activates onboarding
- Sends receipts
- Sends signed agreement
- Sends onboarding instructions
- Notifies admin

12. Payment Modes

Mode 1 — Deposit Payment

Example:

50% upfront

Flow:

Sign → Pay Deposit → Project Starts

Mode 2 — Full Payment

Flow:

Sign → Pay Full Amount → Service Activated

Best for:

- Small projects
 - Consulting
 - Digital products
-

Mode 3 — Subscription Billing

Flow:

Sign → Add Card → Recurring Billing Starts

Best for:

- Retainers
 - SaaS
 - Monthly support
-

Mode 4 — Invoice After Signing

Flow:

Sign → Invoice Sent → Manual Payment

Best for:

- Enterprise clients
 - Government contracts
-

13. Payment Features

The system must support:

- Auto-generated invoices
- VAT/tax calculations
- Payment receipts
- Partial payments

- Coupon codes
 - Failed payment retries
 - Payment reminders
 - Late payment reminders
 - Recurring billing
 - Proposal auto-expiry
 - Apple Pay
 - Google Pay
-

14. Complete Client Flow

CLIENT JOURNEY

Step 1

Client receives branded proposal email

Step 2

Client opens proposal page

Step 3

Client reviews proposal options

Step 4

Client clicks “View Details”

Step 5

Client reviews agreement

Step 6

Client signs digitally

Step 7

Client proceeds to secure payment page

Step 8

Client completes payment

Step 9

Client receives:

- Signed agreement PDF
- Receipt

- Welcome email
- Onboarding instructions

Step 10

Admin dashboard updates automatically

Statuses:

- Draft
 - Sent
 - Viewed
 - Signed
 - Payment Pending
 - Paid
 - Onboarding
 - Active
 - Expired
 - Rejected
-

15. Admin Dashboard

Dashboard Features

- Proposal management
- CRM/client management
- Proposal analytics
- Revenue analytics
- Activity logs
- Notifications
- Team management
- Proposal templates

Analytics

- Open rates
- Click rates
- Signature rates
- Conversion rates

- Revenue tracking
 - Outstanding balances
-

16. Automation Engine

After successful payment:

- Generate onboarding workspace
 - Create CRM record
 - Send onboarding forms
 - Notify project manager
 - Generate invoice
 - Trigger workflow automations
 - Send Slack/Discord invite
 - Create client portal access
-

17. Security & Compliance

The platform must include:

- SSL encryption
 - Secure document storage
 - Audit logs
 - Signed URLs
 - Role permissions
 - Two-factor authentication
 - GDPR compliance
 - POPIA compliance
-

18. Technical Stack

Frontend

- Next.js
- React
- TailwindCSS
- Framer Motion

Backend

- Node.js
- NestJS OR Express

Database

- PostgreSQL

Authentication

- Clerk OR Auth0

Storage

- AWS S3

Email Infrastructure

- Resend OR SendGrid

PDF Generation

- Puppeteer

Hosting

- Vercel
 - AWS
-

19. Future Features

Future roadmap:

- AI-generated proposals
 - AI-generated agreements
 - WhatsApp proposal delivery
 - Multi-language support
 - Team collaboration
 - White-label mode
 - Proposal analytics heatmaps
 - Client portal
 - API integrations
 - eKYC verification
 - Mobile applications
-

20. Required UI Pages

- Login
 - Register
 - Dashboard
 - Proposal Builder
 - Proposal Preview
 - Proposal Detail Page
 - Agreement Signing Page
 - Payment Page
 - Analytics
 - CRM
 - Templates
 - Notifications
 - Settings
-

21. UX Requirements

The transition from:

Proposal → Agreement → Payment

must feel like:

- One continuous onboarding experience
- Premium
- Secure
- Fast
- Mobile-friendly
- Enterprise-grade

The system should require minimal clicks while maintaining trust and professionalism.

22. Desired Final Outcome

A fully functional SaaS platform where:

1. SCL Agency creates proposals
2. Clients receive branded emails

3. Clients review package options
4. Clients digitally sign agreements
5. Clients complete payments
6. PDFs and receipts are automatically generated
7. Onboarding starts automatically
8. Everything is tracked inside a professional dashboard

The platform should become a scalable infrastructure system for:

- Client onboarding
- Proposal management
- Contract automation
- Payment processing
- Revenue operations
- Enterprise workflow automation
